Targi Kielce Industrial Autumn is the cluster of industry-focussed events dedicated for:

- casting business-sector
- aluminium processing
- non ferrous metals
- heat treatment of metals
- recycling
- measurement equipment and instruments

METAL 2018 is an integral part of 73. World Foundry Congress in Krakow,

held from 23 to 27.09.2018.

On 26.09.2018 the Congress participants will
take part in the off-site session held
at Targi Kielce.

COMPONENTS FOR FOUNDRY - suppliers' offer

The components for foundry business showcased at METAL by the industry leaders - a wide and diversified range of products and services include : chemicals, ferro-alloys, refiners and alloy- modifiers as well as metal-mould coatings, lubricants and hydraulic fluids.

To complement the offer, the expo showcases air purification and filtering devices used in foundries, heat exchangers, crucibles, thermocouples guards, fixtures. Sub-suppliers also offer separating agents and mixing and dosing devices for separating agents.

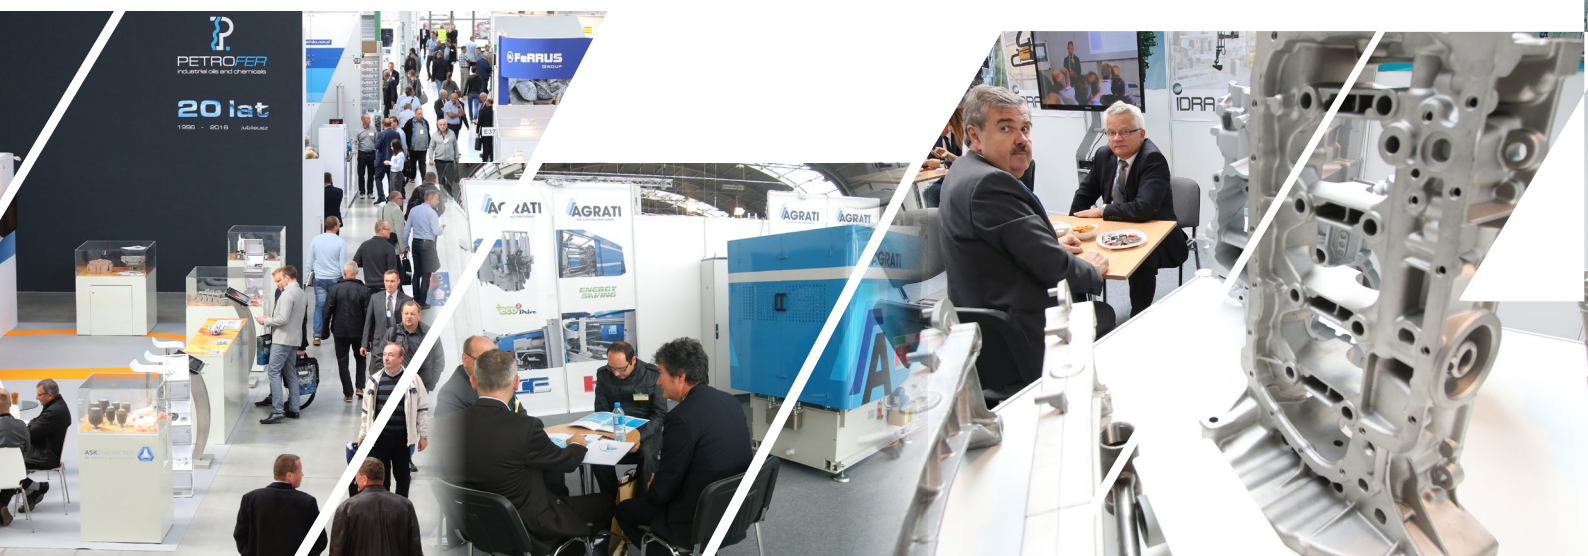

PRESSURE DIE CASTING - the leading business sector

The previous METAL edition was largely dominated by the die-casting sector. Companies from Germany, Italy, Denmark and Switzerland found opportunities to establish cooperation with new customers and find new markets. Italian companies such as AGRATI, IDRA, ITALPRESSE, COLOSIO, the Danish DISA and Swiss Bühler showcased their offer.

TARGI KIELCE - the bridge between the east and the west

East-based companies have again marked their presence at the Kielce expo, there were representations of Russia, Ukraine and Belarus. Far-east companies, such as China's YIZUMI which offer pressure die casting equipment were also represented.
